EDUCATION

TEMPLE UNIVERSITY – School of Engineering, Philadelphia, PA — Graduation: December 2027
Major: Bachelor of Science in Electrical Engineering

EXPERIENCE

Mercor — **2026 – Present**
AI Trainer / Data Annotator

- Evaluate AI-generated STEM and engineering responses for factual accuracy, reasoning quality, and adherence to task-specific evaluation criteria.
- Analyze technical problem-solving across engineering, mathematics, and programming domains, identifying reasoning errors and providing structured quality assessments.

Amazon, Beaumont, CA — **Jun. 2026 – Aug. 2026**
Area Maintenance Manager Intern

- Designed and shipped Alert Agent, a real-time equipment monitoring platform now in production use by senior automation engineers (see Projects).
- Led a cross-functional team of maintenance and operations associates, resolving equipment issues under time pressure while coordinating with contractors, technicians, and building managers.

Philadelphia Gas Works, Philadelphia, PA — **Jun. 2025 – Aug. 2025**
Engineering Intern

- Assisted with reviewing and updating electrical plans, including two-phase to three-phase conversions.
- Supported engineers with conduit layout, equipment placement, and code compliance tasks.

Temple University, Philadelphia, PA — **Jan. 2025 – May 2025**
Teaching Assistant, Engineering Computation

- Assisted students with programming concepts and problem-solving in C, C++, and Python.
- Supported the instructor with grading assignments, leading lab sessions, and clarifying course materials.
- Helped students debug code, analyze computational results, and apply engineering logic to programming tasks.

PROJECTS

Alert Agent — Real-Time Equipment Alerting Platform (Amazon Internship) — **Summer 2026**
Python, FastAPI, asyncio, SQLAlchemy, SQLite, JavaScript, Tampermonkey, AWS SigV4, Slack API, PyInstaller

- **Built and deployed** a real-time equipment monitoring platform ingesting live equipment-health (OEE) and alarm data from fulfillment-center dashboards, Slack-alerting operators the instant a station goes down; in production use by senior automation engineers.
- **Engineered a browser-based data bridge** (JavaScript/Tampermonkey) streaming to a local FastAPI + SQLite backend after direct API and data-lake access were blocked; designed a windowed rule engine with event deduplication to eliminate false alerts.
- **Diagnosed a tab-throttling bug**, cutting live-data latency from 2+ minutes to under 1 minute across 6 concurrent stations, and packaged the system as a one-click Windows app (PyInstaller) with analytics and Excel export.

The Arcade — Multiplayer Gaming Platform (Temple University, ECE 3822 Team Project) — **Spring 2026**
C++, Python, Pygame, custom Hash Table & Heap/Priority Queue, sockets, OOP

- **Built the C++ real-time game server and Pygame client UI** for a multiplayer arcade platform supporting live gameplay, chat, and leaderboards for 25+ simultaneous connections, fully demoed live; implemented a hash table and heap/priority queue from scratch to back player-profile lookups and leaderboard queries against a 10,000+ player, 100,000+ session synthetic dataset.

DC Motor Speedometer (Temple University, EE3613 Processor Systems Lab) — **Spring 2025**
C, AVR Assembly, ATmega324PB, Microchip Studio, PWM, I2C

- **Designed a solo embedded system** on the ATmega324PB Xplained Pro combining PWM-based DC motor speed control, optical RPM sensing, and a real-time speed readout on an OLED display over I2C.

TECHNICAL & SOFTWARE SKILLS

- **Programming:** Python, C++, C, JavaScript, SQL
- **Engineering:** AutoCAD, Revit, MATLAB, Microcontrollers, PWM, I²C, Circuit Design & Analysis (AC/DC)
- **Software & Cloud:** AWS, FastAPI, SQLAlchemy, SQLite, Power BI, Microsoft Office
- **Lab Equipment:** Oscilloscopes, Multimeters, Function Generators, VirtualBench

PROFESSIONAL CERTIFICATES

NFPA 70E Certification — NFPA, June 2026
Preparing Data for Analysis with Microsoft Excel — Coursera, May 2024
Autodesk Fusion 360 – Integrated CAD/CAM/CAE — Coursera, Jun. 2024

PROFESSIONAL AFFILIATIONS

IEEE — Spring 2024 – Current
Temple Formula Racing — Fall 2022 – Spring 2023

ADDITIONAL EXPERIENCE

FIT GYM, Philadelphia, PA — Shift Supervisor — Dec. 2022 – Mar. 2023
MANAKEESH CAFÉ, Philadelphia, PA — Store Manager — Sep. 2019 – Apr. 2021
